

CS 372 Introduction to Computer Networks
Self-Check Exercises: Lecture 5

- 1) In terms of physical media, what is multiplexing
- 2) What is the role of physical media in access networks.
- 3) What are some examples of guided media, and where are they used?
- 4) What are some examples of unguided media, and where are they used?
- 5) What is the benefit of broadband cabling over baseband cabling?
- 6) Communication via guided media is complex enough by itself, but communication via unguided (wireless) media is even more complicated. What are some additional difficulties of wireless networking?
