CS 372   **Introduction to Computer Networks**
Self-Check Exercises: Lecture 15

1) Using the Sockets API, how is a socket similar to a file?

2) What is necessary in the setup of a socket to specify this is going to be a UDP socket?

3) What is necessary in the setup of a socket to specify this is going to be a TCP socket?

4) Where can I go for help with socket programming (from Syllabus)?
